Email: omprakash397918@gmail.com
Mobile: +919838397918

SKILLS

Languages: C++, Java, Python
Tools/Platforms: Nmap ,Wireshark, GHDB ,TryHackme, LeetCode
Soft Skills: Problem-Solving, Team Player, Project Management, Adaptability

TRAINING

Data Structure and Algorithm Using C++ (LPU Educational Institute) Jun’ 23 – Jul’ 23

- Implemented core Data Structures such as arrays, linked lists, stacks, queues, trees, graphs, and hash tables in C++, improving algorithmic problem-solving efficiency by 30%.
- Solved 200+ Data Structure and Algorithm challenges, applying concepts like sorting, searching, recursion, dynamic programming, and greedy algorithms to enhance logical thinking and coding speed.
- Optimized C++ programs by analyzing time and space complexity, achieving up to 40% efficiency improvement in algorithm performance during training projects.

PROJECTS

Cybersecurity Lab Web Application | *Node.js, Express, SQLite, Vulnerable Web App* May’ 25

- Designed and developed an intentionally vulnerable full-stack web application using Node.js, Express and SQLite, enabling students to practice real-world attacks such as SQL Injection, XSS, authentication bypass, and insecure direct object references.
- Built dual versions of the application – vulnerable and securely patched – providing hands-on learning for security analysis, exploit demonstration, and mitigation strategies, improving classroom training effectiveness by 40%.
- Created comprehensive documentation, including lab manuals, teacher guides, and walkthroughs, ensuring seamless deployment in classrooms and supporting students in performing ethical cybersecurity testing.

Auto Timetable Generator | *HTML, CSS, JavaScript* Jun’ 24

- Developed a dynamic timetable generation system with teacher and section-based filtering, enabling users to instantly view customized schedules through an intuitive web interface.
- Implemented a structured timetable layout using HTML/CSS with color-coded subject indicators for clear visual differentiation and improved readability.
- Integrated JavaScript-driven filter logic to update timetable results in real time without page reloads, enhancing user experience and interaction efficiency.

Cybersecurity ChatBot | *Python, NLP, Machine Learning, Flask* Aug’25

- Built an NLP-powered cybersecurity ChatBot using Python to handle queries on malware, network security, encryption, and ethical hacking with 90% response accuracy.
- Implemented TF-IDF and ML-based intent classification, improving query understanding and reducing response latency by 40%.
- Deployed the ChatBot via a Flask web interface, delivering real-time responses and achieving a 95% user satisfaction score.

CERTIFICATES

Privacy and Security in Online Social Media | NPTEL May’ 24

Data Structure and Algorithm | Lovely Professional University Mar’ 23

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology Aug’ 21 – Present
Computer Science and Engineering

Mahatma Gandhi Inter College Gorakhpur, U Pradesh
Intermediate Mar’ 20 – May’ 21
PCM

Siddharth Public School Siddharth , U Pradesh
Matriculation Mar’ 18 – May’ 19
